

## Focal enhances its car audio offering with two new subwoofers, for the ultimate in driving and listening pleasure

---

Focal introduces ISUB ACTIVE and ISUB ACTIVE 2.1, two subwoofers to complement and improve its in-car audio system. With their powerful and dynamic bass, these ultra-compact subwoofers genuinely enhance the on-board sound experience. Connecting to the original car radio via the cables supplied, these *Plug & Play* products from the Focal Inside collection benefit from the brand's unique know-how to provide high-quality listening experiences.

### FOR A COMPLETE AUDIO SYSTEM

ISUB ACTIVE and ISUB ACTIVE 2.1 are the perfect addition to an original audio system, connecting easily to the speaker driver outputs of the car radio thanks to the 'Plug & Play' cable supplied by Focal. They deliver 260 watts of power, as well as impressive dynamics and sound nuances, without taking up any space in the cabin or boot. These amplified products stand only 2½" (6.3cm) tall, and slide easily beneath even the narrowest of seats. ISUB Active 2.1 pushes the boundaries with a 2 in 1 solution, incorporating a 2-channel amplifier to amplify the vehicle's front speakers for a 2.1 system.

**Available :** May 2023

### CUSTOM SOUND AND FOCAL QUALITY

When developing these new subwoofers, the Focal engineers took care to include simple yet comprehensive settings, offering users the option to create a custom sound rendering and harmony across all speaker drivers. A wired control remote etis also provided for users to adjust the bass level as desired.

Hi-Fi system built into production vehicles, custom audio kits, Plug & Play products to replace or complement original systems: since the 1990s, Focal has made its name as the leading brand in the world of on-board sound, delivering uncompromising sound quality.
